

ARTICLE XI

C – 3 CENTRAL BUSINESS DISTRICT

Section 11.04 – Alteration, Site, and Façade Plan Required

- A. Prior to any exterior aesthetic or cosmetic alteration (siding, paint, windows, or any exterior work that does not require a building permit) on any building located in the C-3 Central Business District, the building owner or occupant must obtain a Zoning Compliance Permit from the Zoning Administrator. The zoning Compliance Permit application shall include a building façade plan pursuant to Article XXII, Section 22.03. The plan must contain schematics and photos or drawn rendering of the proposed alterations with applicable color sample attached. The Design Review Committee will determine if the applicant's plan conforms to the approved Downtown Design Standards. If not, the applicant will be required to amend the plan and resubmit the plan approval by the Design Review Committee. Failure to comply with the Downtown Design Standards will result in rejection of the applicant's plan and any alteration will be prohibited.

- B. Prior to the issuance of a building permit in the C-3 Central Business District for any new construction or for the remodeling of any existing building or structure which will involve the exterior façade or other exterior surface in any way, the Zoning Administrator shall cause the application including a site and a façade plan prepared pursuant to the provision of Article XXII, Section 22.05 to be submitted to the Design Review Committee for review and determination of compliance with the approved Downtown Design Standards for the Central Business District. The Design Review Committee shall notify the applicant concerning any features and colors inconsistent with the approved standards. Any proposed new construction or remodeling of any existing buildings found to be inconsistent with the standards for the district by the Design Review Committee shall be disqualified for any incentive offered by the City or Downtown Development Authority. The applicant's proposal shall be rejected and no building permit issued until the site and façade plan are in conformance with the approved Downtown Design Standards and the plan approved by the Design Review Committee and the Plan Commission.

Approved by Plan Commission 11-13-2007
